Physical Security

Video Surveillance

CCTV, IP surveillance, video analytics - CCTV (closed circuit television) is a television system in which signals are not publicly distributed; camera data is stored and monitored and reviewed in the Central Control Room. It's used in areas such as a store, office building, or on a college campus. CCTV is commonly used in surveillance systems

Parking Management System

Parking Management system will help to control the traffic in the parking area, information on the available parking slots. By using the Barrier with vehicle tag, you can restrict unauthorized entry to your parking premises.

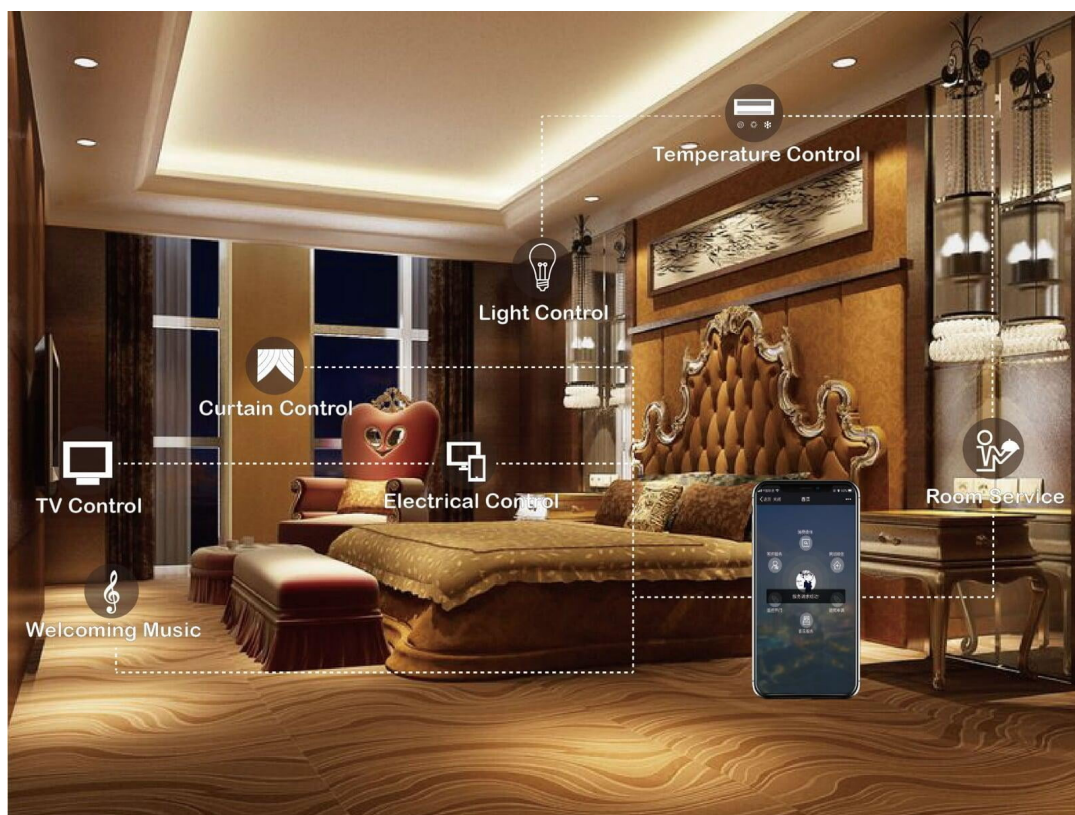

Access Control RFID

bio-metric reader, smart card reader, proximity card reader, controller and cards. Access control is a system which enables an authority to control access to areas and resources in a given physical facility or computer-based information system, which will be one stop source to your manned security and Access control system, will ensure your premises security.

GRMS Solutions

Guest Room Management Systems (GRMS) are integral to creating efficient, automated, and comfortable environments for hotel guests. GRMS systems provide a range of functionalities, including lighting control, climate management, and entertainment options. Central to the effectiveness of these systems are communication protocols that enable seamless interaction between various devices. Among these, Zigbee and EnOcean protocols stand out as key technologies in optimizing GRMS performance.

Elevate Enterprise **Solutions**

Empower Your Business With Google Cloud

Google Cloud Platform enables the creation and expansion of applications, websites, and services using Google's infrastructure. It offers a range of services such as computing, storage, networking, big data analytics, machine learning, and IoT solutions, along with management and security tools. iSolution harnesses GCP's innovations to empower new business opportunities. We are passionate about sharing our knowledge to help you achieve lasting success.

AI based Intelligence

Face Recognition Solution

01 Facial Recognition

Identification and verification of faces

02 Attribute Recognition

Recognition of gender, age, emotions, masks

03 Liveness check

Biometric presentation attack detection

04 Silhouette recognition

Body position recognition

05 Gesture Recognition

Recognition of static and dynamic gestures

06 Movement tracking

Multi-camera tracking of body silhouettes

07 PPE recognition

Recognition of personal protective equipment

08 Vehicle recognition

Recognition of vehicle brands, models, registration plates, etc.

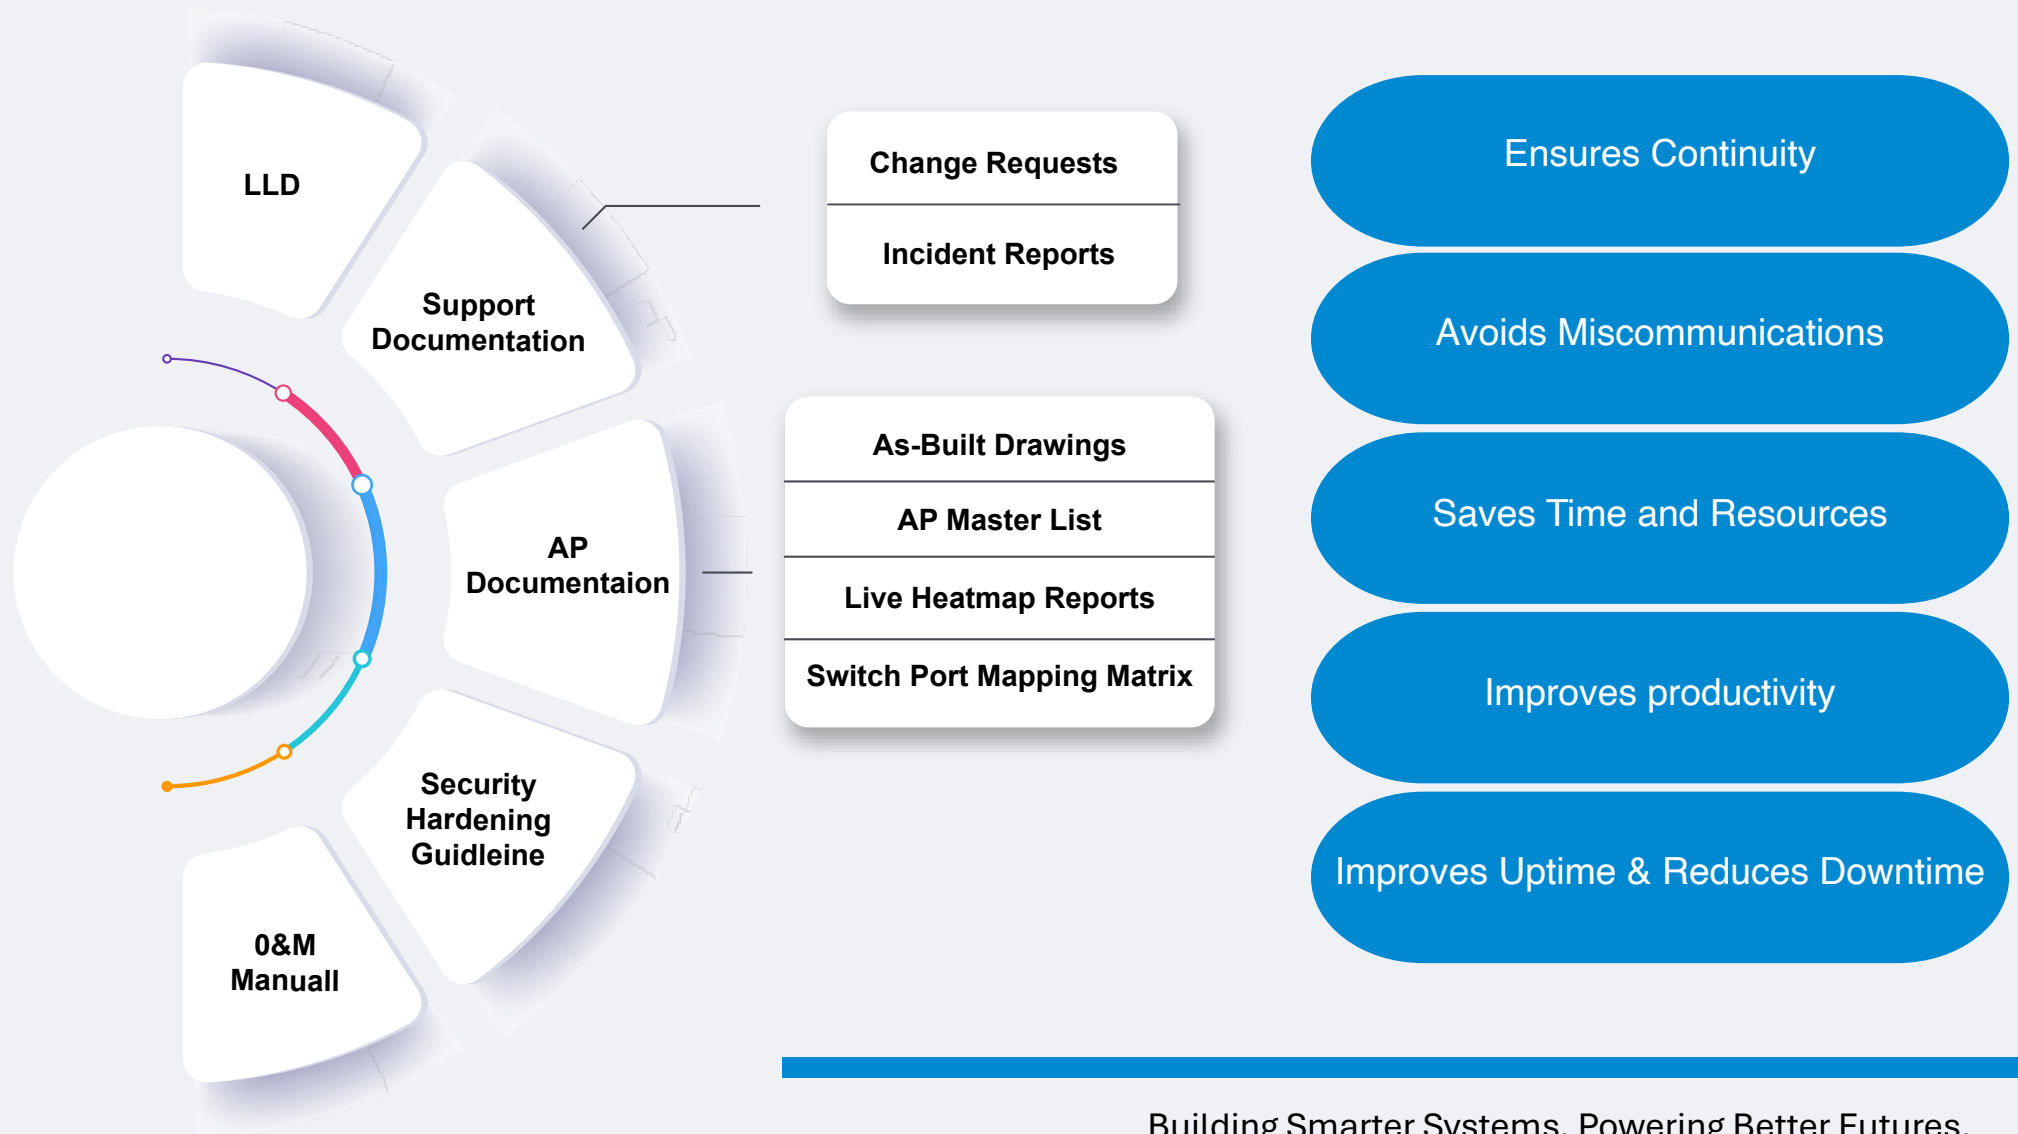

Network Security

- Firewall
- Network Segmentation
- Access Control
- Remote Access VPN
- Zero Trust Network Access
- Intrusion Prevention Systems
- Cloud Network Security

Post Implementation Documentation

NOC Operation **Managed Services**

Visibility

Network performance dashboards and compliance reporting.

Automation

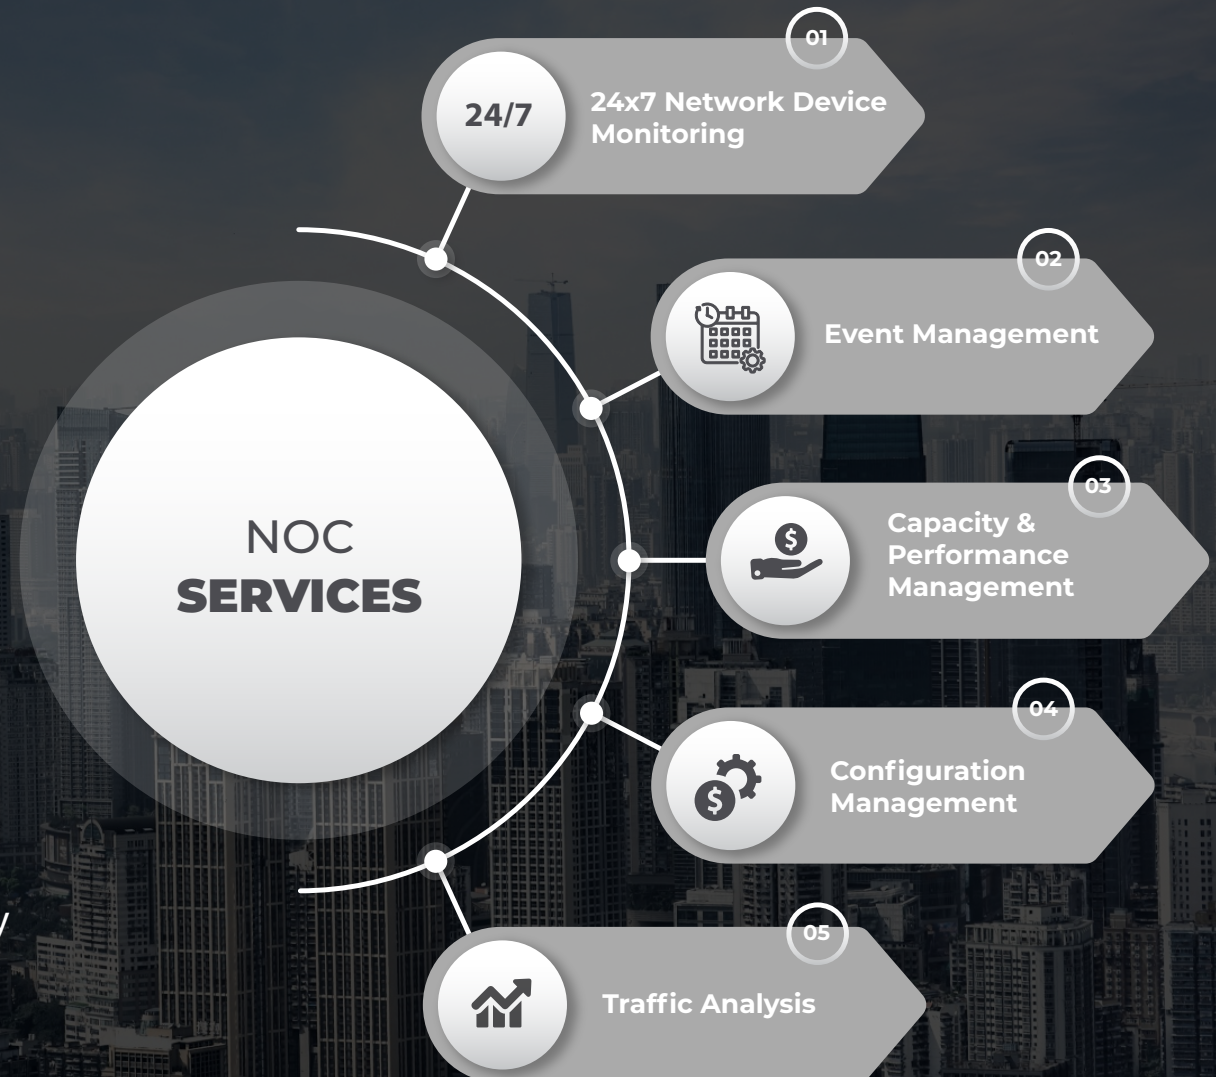

Leads to faster resolution.

Actionable insights and qualified alerts

For intelligent decision-making.

Visibility

Right shoring and automation-led delivery reduce costs by 20-30%.

Partnered with approved LSP - International Hotel chains
